

2020 Endowment Request: A/V Resources

Part One: 70-inch Monitor and Accessories

- 70-inch LCD monitor
- Wall mount
- Cables

Purpose: The Flat-Screen Monitor would be mounted in the sanctuary (most likely to the side of the altar/pulpit, on the opposite side of the piano). The monitor would provide the following benefits:

- Allow for easy display of slides and videos via Bluetooth from any connected device (smart phone, laptop, tablet). This will avoid the inconvenience of having to set up the screen, set up the projector, manually connect the projector to a device, plug in the projector using extension cords, and be careful no one trips over the cords. This will also allow guests speakers to more easily set up before a presentation, without requiring a special training session or projector specialist on hand.
- Higher quality, brighter display than the current projector (no need to dim the lights)
- More professional and smoother events, including Sunday Services, Adult Faith Development events, Environmental Justice Films, workshops, etc.
- Would make our fellowship more appealing to those who might want to rent our facilities

Cost: Approximately \$1,000

Part Two: Portable PA System

- Four-channel Bluetooth speaker
- Portable microphone
- Stand
- Rechargeable battery

Purpose: This Portable PA System can function inside the sanctuary, inside the fellowship hall, or outdoors. The system would provide the following benefits:

- Allow us to conduct outdoor services or events to ensure social distancing during this time of Covid-19 (or anytime in the future)
- Project sound in the fellowship hall if needed
- Provide sound for the new monitor without interfering with the existing sound system (and using up available channels)

Cost: Approximately \$750
